# Our Company

*„The guarantee of good quality lasts longer than the pleasure of a low price.“*

The company Elias Kuli GmbH & Co. KG offers high-quality PVC windows, aluminum constructions, roller shutters, external blinds and insect protection. The innovative SUPERtermo® pane technology achieves a thermal coefficient value of  $U_g=0.5 \text{ W/m}^2\text{K}$ . We also give a guarantee of up to 7 years on our windows.

Our most important goal is the satisfaction of our customers. For this reason, we maintain our wide product range and always ensure that our windows are of high product quality.

## Other services

At Elias Kuli GmbH & Co. KG you get all work from a single source.

This is made possible by our reliable and highly motivated cooperation partners. You don't need to worry any further. Just rely on us – we'll take care of everything.

We also work with architects so that we can carry out the entire construction planning through to the finished building.

# Light

Let light and solar energy into your home. You can choose from energy-saving, transparent, or decorative glazing. And on hot days, keep cool behind MS roller blinds.

## Acoustics

The world is full of sound. But not always the kind we want to hear. MS windows keep out the noise, so that in your own home you can hear yourself and your loved ones.

# Security

Secure your home. The right kind of hardware including Secustik handles can protect your home from break-ins.

## Warmth and comfort

Keep your home warm without spending a fortune on heating. Our windows feature energy-saving solutions.

ALU LOOK is the cold chic of aluminium together with a warm PVC profile. The right-angle corner joints sealed from the inside and outside and modern decorative films make the windows look like aluminium ones. Only MS Okna offers this type of frame and leaf joint sealed on both sides of the window.

## Parameters

- frame - width 82 mm, 7 chambers
- leaf - width 82 mm, 6 chambers
- thermal transmittance coefficient  $U_w = 0.73^* \text{ W/m}^2\text{K}$
- sound insulation coefficient from  $R_w \geq 35 \text{ dB}$
- resistance to wind-loading up to 158 km/h

## Fittings

- MACO Multi-Matic anti-slamming hardware
- METZ Secustik© anti-burglary handle
- 3 anti-burglary latches
- 3 gaskets (additional gasket under glazing pane)
- stiff, steel closed reinforcement in frame
- decorative film with aluminium structure or black matt (Jet Black)

## Extra fittings

- RC1 and RC2 anti-burglary fittings
- window contacts
- compact, radio operated roller shutters
- anti-burglary panes
- doors include low, warm aluminium threshold with thermal barrier
- concealed hardware

\* thermal transmittance coefficient for reference window with SUPERtermo 0.5 and CHROMATECH ultra warm frame

## WINDOW **WOOD LOOK<sup>®</sup>** +

Wood Look+ offers the aesthetics of a wooden window with the functionality of PVC. The right-angle corner joints and woodgrain films mean that the windows look like wooden ones. Live in harmony with nature, without giving up the benefits of modern technology.

### Parameters

- frame - width 82 mm, 7 chambers
- leaf - width 82 mm, 6 chambers
- thermal transmittance coefficient  $U_w = 0.73^* \text{ W/m}^2\text{K}$
- sound insulation coefficient from  $R_w \geq 35 \text{ dB}$
- resistance to wind-loading up to 158 km/h

### Fittings

- MACO Multi-Matic anti-slamming hardware
- METZ Secustik© anti-burglary handle
- 3 anti-burglary latches
- 3 gaskets (additional gasket under glazing pane)
- stiff, steel closed reinforcement in frame
- over 40 designs of woodgrain film

### Extra fittings

- RC1 and RC2 anti-burglary fittings
- window contacts
- compact, radio operated roller shutters
- anti-burglary panes
- doors include low, warm aluminium threshold with thermal barrier
- concealed hardware

\* thermal transmittance coefficient for reference window with SUPERtermo 0.5 and CHROMATECH ultra warm frame

# WINDOW MS evolution<sup>[82]</sup>®

MS evolution [82] are designed for those who value warmth, quiet, and security. Comfort of use is ensured by innovative panes offering better light transmission and reliable hardware.

## Parameters

- frame - width 82 mm, 7 chambers
- leaf - width 82 mm, 6 chambers
- thermal transmittance coefficient  $U_w = 0.73^* \text{ W/m}^2\text{K}$
- sound insulation coefficient from  $R_w \geq 35 \text{ dB}$
- resistance to wind-loading up to 158 km/h

## Fittings

- MACO Multi-Matic anti-slamming hardware
- METZ Secustik® anti-burglary handle
- 3 anti-burglary latches
- 3 gaskets (additional gasket under glazing pane)
- stiff, steel closed reinforcement in frame
- over 40 designs of woodgrain film

## Extra fittings

- RC1 and RC2 anti-burglary fittings
- window contacts
- compact, radio operated roller shutters
- anti-burglary panes
- doors include low, warm aluminium threshold with thermal barrier
- concealed hardware

\* thermal transmittance coefficient for reference window with SUPERtermo 0.5 and CHROMATECH ultra warm frame

## WINDOW MSline+®

Windows are a complex product where the crucial elements are often not visible. MSline+ was constructed based on the PVC system by the German SALAMANDER bluEvolution 82 brand.

### Parameters

- frame - width 82 mm, 7 chambers
- leaf - width 82 mm, 6 chambers
- thermal transmittance coefficient  $U_w = 0.73^* \text{ W/m}^2\text{K}$
- sound insulation coefficient from  $R_w \geq 35 \text{ dB}$
- resistance to wind-loading up to 158 km/h

### Fittings

- MACO Multi-Matic anti-slamming hardware
- METZ Secustik© anti-burglary handle
- 3 anti-burglary latches
- 3 gaskets (additional gasket under glazing pane)
- stiff, steel closed reinforcement in frame
- over 40 designs of woodgrain film

### Extra fittings

- RC1 and RC2 anti-burglary fittings
- window contacts
- compact, radio operated roller shutters
- anti-burglary panes
- doors include low, warm aluminium threshold with thermal barrier
- concealed hardware

\* thermal transmittance coefficient for reference window with SUPERtermo 0.5 and CHROMATECH ultra warm frame

Classic and reliable - this is the MSline window system. Manufactured in line with the latest technologies, they are also adapted to the expectations of the individual customer to serve for many long years..

## Parameters

- frame - width 73 mm, 5 chambers
- leaf - width 73 mm, 5 chambers
- thermal transmittance coefficient  $U_w$  od  $0.85^* \text{ W/m}^2\text{K}$
- sound insulation coefficient from  $R_w \geq 35 \text{ dB}$
- resistance to wind-loading up to  $158 \text{ km/h}$

## Fittings

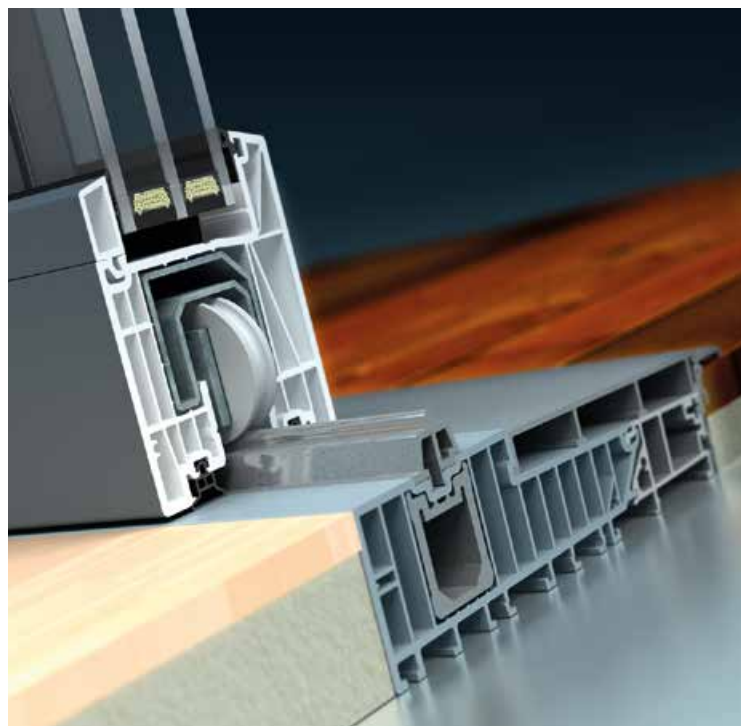

- MACO Multi-Matic anti-slamming hardware
- FKS handle
- anti-burglary latch
- over 40 colours of decorative film

## Extra fittings

- RC1 and RC2 anti-burglary fittings
- window contacts
- compact, radio operated roller shutters
- anti-burglary panes
- doors include low, warm aluminium threshold with thermal barrier
- concealed hardware

\* thermal transmittance coefficient for reference window with SUPERtermo 0.5 and CHROMATECH ultra warm frame

## Large-scale glazing Patio HST doors

Blur the boundaries between living room and garden. Relax the way you want to and where you want to - with large-scale glazing Patio HST doors, it's safe and simple.

Patio HST retains heat while still providing comfort of use. The special Class A German PVC profile with low warm threshold and hardware make it possible to easily slide doors weighing as much as 300 kg.

## How does it work?

- SIEGENIA let you comfortably slide heavy doors thanks to the support systems
- the low EcoPass 15 mm threshold (which meets standards for persons with disabilities in accordance with DIN 18040) and accessories such as drip trays and levelling profiles minimize the risk of tripping when passing through the door
- PVC profiles with steel reinforcement system guarantee rigidity and tightness of construction
- advanced sealing protects from rain, wind and noise
- thermal transmittance coefficient of  $U_d=0.74 \text{ W/m}^2\text{K}$  for 3500x2200 mm doors with SUPERtermo 0.5 glazing and MULTITECH frame
- special handles simplify operation
- when closed, that is when the leaf is lowered onto the threshold and locked, due to its weight and system of bolts creates a barrier for burglars and wind and rain as well. Even in the micro-ventilation position, the door provides a feeling of security.

The impressive size of the Patio HST door (up to 6.5 metres wide and 2.5 metres high) are unavailable for other PVC window systems. The range of 40 decorative woodgrain, single-colour and aluminium-like films let you match the product to any style of façade or taste.

## Roller shutters

We combine innovation, ergonomics, and elegance to provide you with thermal comfort and excellent light transmission. They help protect your privacy and improve the design of your building by giving it a modern style. We use the latest technologies so our mSun+ roller shutters become an integral element of an energy-efficient and smart home.

## Characteristics

- premium quality aluminium slats from Austria
- polyester paint ensures above-average resistance to harsh weather and durability of colour
- impressive sizes not available for other shutter systems (width up to 4.5 m, height up to 5 m).
- available in as many as 21 colours, allowing you to match the product to your individual needs
- different slat designs and details
- tested for quality detailing ensures many years of problem-free use
- advanced technologies, durable brand-name drive systems
- modern, specialist control systems with automatic weather reaction
- many installation possibilities (top-mounted PVC installation, in the window jamb with visible or concealed aluminium cover, on the facade or window frame as a self-supporting system)

# ROLLER SHUTTERS

RADIO OPERATED

Compact MS radio operated roller shutters are a step towards the smart home of the future. A home whose functions adapt to the needs of the residents. We've combined the benefits of rollers with the ease and simplicity of operation provided by programmable remote control.

Automatic functions protecting the interior from excessive sun exposure, noise or cold are only some of the possibilities of modern wireless roller controllers.

## Characteristics

- compact rollers consist of a casing fitted directly on top of the window frame and jamb-mounted shutter guides with brush seals that ensure quiet operation
- PCV or aluminium slats with decorative films available in RAL colours
- different construction variants, allowing you to use the rollers both in newly built homes as well as in renovation of existing buildings
- comfort of use provided by an electric drive based on a wide range of reliable motors suited to the size of the roller with remote control
- can be fitted with automatic bolts preventing the shutter from being raised from outside, providing additional anti-burglary protection
- MS mosquito screens with aluminium frames and glass-fibre mesh which provides excellent light transmission can be installed

## MS ExternAL PREMIUM entrance doors

---

Protection from cold, rain, and potential break-ins, as well as being the calling card of the home – the perfect external doors should have a low thermal transmittance coefficient, a high class of water resistance, and unique design. MS ExternAL PREMIUM doors feature a thermal transmittance coefficient of  $U_g=0.61 \text{ W/m}^2\text{K}$ , water resistance class of 6A, advanced security systems, and much more.

## Glazing units

---

A glazing unit is more than just a filling for the frame. Its properties determine how much light and solar energy enter our homes. It influences the acoustics and security of our homes, as well as our comfort of life. Glazing can provide brighter lighting or the desired level of privacy in the case of decorative glazing. That's why we focus so much on glazing units. MS windows are fitted with glazing units with a thermal transmittance coefficient of  $U_g = 0.5 \text{ W/m}^2\text{K}$  and  $R_w \geq 35 \text{ dB}$ .
